

SolveIT Software is an Australian company specialising in supply chain optimisation and predictive modelling. Employing almost 100 professionals across 5 offices in Australia and Europe, the company offers optimisation applications for a wide variety of industries, including mining, agriculture, manufacturing, defence, education, transportation, and utilities.

Our software applications are based on proprietary platforms for advanced optimisation, prediction, and what-if analysis, and can optimise production and supply chain activities on both a local (plant) and global (network) level. These advanced technologies also give SolveIT's applications the necessary forward visibility to make optimal decisions in supply chain environments that are characterised by uncertainty, variability, and constant change.

"We recognize the world-best optimisation science upon which SolveIT Software's planning & scheduling applications are based, along with the deep domain knowledge they bring to the table in a multitude of complex, vertically integrated, push/pull supply chains. For these reasons, Xstrata Copper and Xstrata Zinc have selected SolveIT Software for optimising the end-to-end copper, zinc, lead, and magnetite supply chains in Australia, from mine planning all the way through to ship loading."

Mr Peter Bates, Chief Information Officer, Xstrata Copper

Through the combination of our proprietary algorithms, applications, and best-practice supply chain expertise, we offer clients a no-compromise approach for simulating and optimising the operational realities that impact business performance and ROI. By effectively managing all the business rules, constraints, variables, and large data sets, we offer clients the unparalleled ability to make optimised business decisions.

Our team of business analysts, modellers, and software engineers work together to implement "exact-fit" applications that deliver significant performance and competitiveness improvements. Our applications empower staff to work more effectively, eliminate non-value-added activities, and handle complex business decisions in less time.

SolveIT Software customers include Rio Tinto, Fortescue Metals Group, Viterro, Xstrata, BHP Billiton, Visy Industries, Pernod Ricard Pacific, Amcor, Incitec Pivot, ETSA Utilities, ElectraNet, Foster's Group, BMA Coal, PFD Food Services, Wilson Transformer Company, Liquor Marketing Group, Dentsu Corporation, and the Australian Defence Science and Technology Organisation (DSTO).

SolveIT Software won the 2011 Award for e-Logistics and Supply Chain category. For more information about SolveIT Software, please visit www.SolveITSoftware.com
